

# Sales

Mitchell Container Services, Inc. provides the highest quality TranStore IBCs from Custom Metalcraft, Inc. These IBCs deliver unsurpassed quality, flexibility, and value. They are the most advanced industrial tank since their introduction into the market.

Standard 2" stainless steel outlet assembly.

## Features

- Patented one-piece 1/2" sloped bottom assures uniform and complete drainage
- 1/4" thick combination lift lugs for offshore and domestic applications
- Stackable to 4 high
- Limitless service life with minimal maintenance
- TranStore tanks meet and exceed U.N./D.O.T. regulations and are approved for shipment of combustible and flammable liquids per title 49 CFR

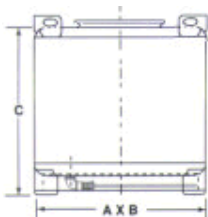

## Options

- Stainless steel material and weld finishes to 320 grit
- Custom sizes and base dimensions
- Stainless steel, carbon steel, or aluminum construction
- Buy, rent, or lease purchase options

Available in standard sizes listed above or in special sizes to fit customer requirements, Custom Metalcraft® TranStore Tanks are constructed of 304 series Stainless Steel or other alloys for storage and transportation of liquid materials. Tanks corners have a 2" radius for strength and easy cleanability and a one-piece bottom available with slope for complete drainage. A variety of closures and valves are available for tanks; a 22" drum cover provides easy access for cleaning and inspection. Weld and material finish on tanks can be suited to meet customer needs. Tanks may be tested and tagged per U.N./D.O.T. regulations for handling liquid materials. The tank is also available to meet various food grade requirements of the USDA and FDA.

CAPACITY	STANDARD TANK SIZES		
	BASE SIZES		
	A	B	C
